

**Subject: Application – IT Operations Support / Junior IT Support Position**

Dear Recruitment Team,

I would like to express my interest in IT-related operations support and junior IT support positions. I am looking for a supportive role where both operational experience and technical curiosity can be effectively utilized.

During my work at Prohuman Zrt., I was responsible for handling customer and internal requests, logging incidents, maintaining documentation, and coordinating problem resolution. In parallel, I completed targeted IT training programs, including Windows environments, Active Directory fundamentals, Hyper-V, and MS SQL Server operations basics.

I believe that my analytical thinking, attention to detail, and strong motivation to learn provide a solid foundation for growth in IT support-oriented roles.

Please review my CV. I would be happy to discuss my application further.

Kind regards,  
Magyar Gyula
