PROFESSIONAL SUMMARY

I am a junior database operations professional with MS SQL-focused training and project experience. I have a background in IT and operations, with strengths in documented, system-oriented work, backup and restore logic, and structured incident handling. My goal is to work in a junior database operations or database support role.

CORE SKILLS

- MS SQL Server installation and basic operations
 - Backup and restore processes
 - Permission management and role-based access control
 - Database design fundamentals (PK, FK, indexes)
 - Querying (SELECT, JOIN, basic optimization)
 - Documentation and audit-oriented mindset
-
